Tamino Minerals Inc. presents Acquisitions Update

Montreal, Canada – Tamino Minerals, Inc. ("Tamino" or the "Company") (OTC Markets: TINO) August 30, 2019, Mr. Pedro Villagran-Garcia, President & CEO, announces that Tamino continues to be hard at work, globally. We have had a fast start to 2019 with excellent results in the first, second and third quarters through our initiatives of sourcing new acquisitions, and financing to become current on OTC Markets. Our Company does envision that we require to create awareness, since Precious Metals Exploration Companies are increasing in Market Capitalization collectively, good opportunities appear more often. We are currently contemplating acquiring several projects that logistically create an advantage, some of them more advanced than others but with high grade gold drilling results. As we mentioned previously, we are only interested in a top quality, progressive operation, generating a positive impact for shareholders as well as in the local communities in which we will operate.

Outlook

Tamino Geologic Team has a long history of making significant investment through its history. Significant results in the past from Tamino's Management have included strong organic growth, the announcement of key strategic partnerships, providing solid Mining Consulting advice to NYSE Listed Companies and an expanded team capable of executing the Company's growth strategy.

We are pleased to report that our executive team, is continuing to produce results. So far this year, we have kept our promise to keep our share structure intact by negotiation with several investors to provide us with non-dilutive financing. A major focus for Tamino in 2019 is to target high quality long-term focused institutional shareholders and high-quality research coverage. When Tamino executes on these plans, our shareholders will see significant increases in value.

The company is not planning to complete a REVERSE SPLIT at this moment and is not in the company's plans to do this. NO DILUTION is guaranteed as our latest DTCC Share Position Report shows that the company has 149,811,161 common shares in the float. Just clarifying that this number is the actual Float. We are also working on preparing Financial Statements in order to remove Stop Sign.

Gold has always been a valuable investment and as the Fed has decided to lower its interest rate, we foresee a significant opportunity in 2019 as prices are projected to surge past \$1,600 an ounce over this year. As gold prices aggressively trend upwards, investors will begin to flock to the haven of physical gold and mining companies producing the ever-sought-after mineral.

On behalf of the Board,

Pedro Villagran-Garcia, President & CEO
Tamino Minerals, Inc.
